

LANGSTON HARRIS JARA

San Francisco, CA | 916-990-8266 | langston.harjar@gmail.com | Data Analyst

PROFILE

Product Data Analyst with a strong track record in player segmentation, monetization strategies, user engagement frameworks, and business optimization. Proven ability to transform complex datasets into actionable insights using advanced SQL and Python. Collaborative, innovative, and results-oriented professional specializing in dynamic analysis and cross-functional leadership.

EMPLOYMENT HISTORY

Product Data Analyst | 2K Games

Novato, CA | 2026 – Present

- Spearheaded product analytics and player segmentation frameworks for card-collecting features, uncovering key engagement trends to increase D30 retention by 12% and overall feature stickiness by 18%.
- Analyzed player investment behavior to inform dynamic pack composition adjustments and strategic monetization models, driving a 13% increase in average revenue for the strongest player cohort.
- Partnered with product managers and game designers to evaluate dynamic pricing strategies, improving in-game economy balance and reducing virtual resource inflation by 15%.

Data Analyst | Dropbox

San Francisco, CA | 2025 – 2026

- Managed reporting and analytics for ~30% of the company's business, leveraging advanced SQL window functions to calculate active growth comparisons between quarters, reducing report generation time by 40 hours monthly.
- Partnered with cross-functional teams to redefine organization-wide sales logic, presenting data-driven go-to-market strategies directly to C-Suite executives that contributed to a 2.5 million USD pipeline increase in Q3.

GTM/SalesOps Data Analyst | LinkedIn

San Francisco, CA | 2024 – 2025

- Segmented the existing customer base to identify long-tail customer distributions, uncovering 1.2 million USD in cross-selling opportunities and mitigating regional churn by 14%.
- Engineered predictive models and performed rapid dataframe manipulations utilizing Python and Polars for advanced grouping and sorting, processing 50M+ rows 3x faster than legacy scripts.
- Conducted exploratory A/B testing and inferential statistics to drive core KPIs across B2B and B2C channels, resulting in a 17% boost in lead prospect conversion rates.

Data Analyst | Google

Redwood City, CA | 2022 – 2023

- Executed expert-level SQL queries—including precise daily result isolation and complex schema troubleshooting—reducing query runtimes by 35% and cutting operational data costs by 150,000 USD annually.
- Designed intuitive data storytelling dashboards to guide ad-sellers toward high-potential revenue streams, increasing ad-seller productivity by 20%.
- Spearheaded measurement and analysis changes within the Google Ads platform, optimizing data signals and taxonomy to improve tracking accuracy by 25%.

Data Analyst | California YMCA Youth & Government

Sacramento, CA | 2019 – 2021

- Engineered robust data pipelines for program, payment, and donor information using custom functions, macros, and Apps Script APIs, eliminating 30+ hours of weekly manual data entry.
- Delivered high-level reporting and strategic insights directly to executive leadership, Board of Directors, and management teams to secure a 15% increase in annual funding.
